

ELECTROLYTIC CAP™

The Jantzen Audio Electrolytic Cap™ offers great usability for budget and medium range crossover application.

A great choice for bass section on crossovers.

Small in size and price friendly this capacitor is great for simple constructions and where spacing on crossover is a factor.

HIGHLIGHTS

Non-polarized aluminum electrolytic capacitor

Great for budget to medium quality crossover application

Small in size for easy application even in tight spacing on crossovers

Ideal for bass section on any crossover

TECHNICAL INFORMATION

- Aluminum electrolytic film (metal oxide layer)
- Working temperatures: -40 to +85 degrees Celsius
- Voltage rating: 100V DC
- Leakage current: < 0.003 CRUR (μ A) After 120S operation
- Capacitance change rate less than +/- 20%
- Capacitance tolerance : +/- 10%
- Dissipation factor: @1 KHZ, $\text{tg}\delta$: Less than 120% of set value
@1 KHZ: less than 0.10
